

## Ceiling Mounted Lights

# BENE

**BENE** downlights from extruded Aluminium, with special PMMA lens and antiglare PC screen reflectors, up to 150Lumen, Per Watt and 3Step MacAdam, in order to suit your lighting needs. Furthermore as luminaire fixtures they demonstrates the difference between common illumination from architectural lighting. BENE transforms an invisible Led into a powerful uniform lighting. From single modules measuring just 35mm up to 138mm, become either small or large like a dynamic composition, to design ceilings.

High contrast distribution, Opti Beam optical technology, with lenses, and reflectors, as well as a wide range of luminous flux ranging from 180 to 3000 lumen, and distributions from spot to medium, flood and wide flood.
