

# SERENO

projector

BRIGHT SPECIAL LIGHTING SA presents a high performance flood light **SERENO** in different designs. Luminaire luminous flux up to 187.500Lumen, they set the new standards in terms of economy and efficiency. This range continuous our history of successful high performance floodlights with all the quality features.

SERENO are characterized by the extremely long life time of their LED, power supply and precise optical systems. Aluminum and PC Lenses are used to deflect the light and optimize efficiency.

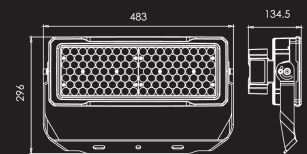

A varying selection of optics ensure superior efficiency in any space requiring illumination. Our Floodlights guarantee chromatic quality, glare control and smart system management and ensure safety for all.

In addition, our luminaires are extremely reliable and have high levels of resistance against adverse weather conditions and potential vandalism. When lighting streets and sport complexes, it is important to considerate lighting for safety, effective crowd management, guarantee visual comfort for optimum viewing from all seats, keep maintenance work and costs to a minimum, and to generate energy savings up to 70% by combining the best of LED technology with a range of control systems.

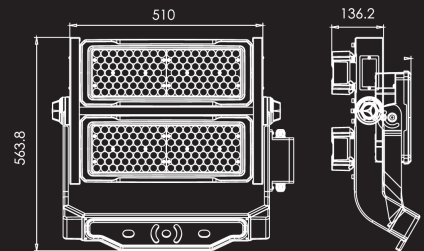

Whatever the project, whatever the complex, there is a fitting waiting for you.
