

FILIA

Explore our indoor Ceramic lighting range. Proven classic styles to achieve the perfect look for your living area. Depending on your preferences and with the right luminaire, you can create the right atmosphere.

Whatever your need, whatever the room, there's a fitting waiting for you. In some cases, a fitting can become the centre of the room, bringing a space together with style and personality.

FILIA is ideal for various types of environments that require illumination from above. According to the atmosphere that you want to create, the suspended light can be an actual furnishing object, or a detail that is naturally integrated into the surrounding space.

Choosing interior lighting that represent your style and interests creates a space that reflects who you are. Whether you are decorating a new or updating an existing room, adding just a few accents can tie together your overall design for a finished space to be proud of.

We love light. We understand light. We know how light can guide and focus attention. Most importantly, we understand how light affects people.

 **Part of our product range is made by "hand"**

The production of our lighting fixtures is not only based in the principles of the latest lighting technology, but also to the uniqueness of hand made products. Our plaster and ceramic range of luminaires is produced in our laboratories, following traditional techniques, in order to create products of high quality and design. Made "by hand" are also the special created pendant luminaires of the interior category, using materials such as textiles and suede (leather).

Light always wins darkness
Happy Easter
